

## **Free Program Makes it Easy For Eligible Georgians to Save on Prescription Medicines**

As the number of uninsured Americans with chronic conditions rises, more and more people are finding it difficult to maintain their health. To help individuals without prescription coverage access the medicines they need, many of the nation's leading pharmaceutical companies sponsor the Together Rx Access® Program. Most Together Rx Access cardholders save 25 to 40 percent\* on brand-name prescription products, right at the pharmacy counter. Medicines in the Program include those used to treat high cholesterol, diabetes, depression, arthritis, asthma, and many other common conditions. Savings are also available on a wide range of generic products. The Card is free to get and free to use.

A unique feature of the Together Rx Access Program is the quick start savings card, which is a Together Rx Access Card attached to a brochure. Potential enrollees simply detach the Card, and call the toll-free number listed on the brochure to find out if they are eligible, enroll and instantly activate their Card. Healthcare professionals and community advocates interested in receiving a supply of Together Rx Access brochures and quick start savings cards for distribution to eligible individuals, visit

<http://www.togetherrxaccessonline.com/order/>.

\*Each cardholder's savings depend on such factors as the particular drug purchased, amount purchased, and the pharmacy where purchased. Participating companies independently set the level of savings offered and the products included in the program. Those decisions are subject to change.
